

## BEE - Armchair

The BEE collection is a set of comfortable and modernist armchairs. Wide, soft and rounded seats and backrests are very well shaped. This model is available in two versions as BEE M and BEE H, both of them are comfortable and ergonomic.

The BEE POUF version does not have a backrest or armrests, in combination with an armchair it is a perfect proposition for an informal meetings or relaxing places.

The covers for all versions of BEE are sewn. The BEE collection apart from its usability can be also treated as a decorative element of modern interiors. It is recommended for the offices, hotels, coffee shops, waiting rooms and relaxing spaces.
